PROFESSIONAL SUMMARY

Mobile developer with 4+ years building and shipping production-grade Android applications on Google Play. Specialized in **Kotlin**, **Jetpack Compose**, and **Kotlin / Compose Multiplatform (KMP / CMP)**, with deep experience in **multi-module Clean Architecture (MVI / MVVM)**. Proven across real-time systems (video/audio calling, chat, live GPS tracking), multi-gateway payments, white-label productization, and CI/CD automation. Take full ownership from architecture through Play Store release, and mentor junior engineers.

CORE SKILLS

Languages	Kotlin · Java · Swift · Dart	UI / UX	Compose · CMP · Material 3 · XML · RTL/Arabic
Architecture	Clean (multi-module) · MVI · MVVM · White-label	Cross-Platform	KMP · CMP · shared business logic
Async & DI	Coroutines · Flow · Hilt/Dagger · Koin	Networking	Ktor · Retrofit · OkHttp · SSL pinning
Real-time	Socket.IO · WebRTC · ZEGOCLOUD · Twilio · Vonage · PiP	Data	Room · DataStore · Paging 3
Backend/Maps	Firebase (Auth/FCM/Crashlytics) · Google Maps	Payments	Stripe · PayTabs · HyperPay · Moyasar
Testing	JUnit · MockK · Turbine · Espresso	Build/DevOps	Gradle KTS · GitHub Actions · GitLab CI · R8

SELECTED PROJECTS

H&I — Construction Services Marketplace **two-app platform (User + Provider)**

Connects clients with construction professionals (architecture, legal, trades). Provider profiles, reviews, real-time chat, and **voice/video calling** (ZEGOCLOUD · Twilio · Vonage) with **Picture-in-Picture**, plus secure contract & document management. Compose over a Socket.IO real-time layer.
[User app ↗](#) · [Provider app ↗](#)

SAST — Smart Student Transportation **two-app platform (Parent + Captain)**

Captain app: daily trip management, **QR-scan attendance**, route maps, ratings. Parent app: **real-time GPS bus tracking**, live notifications, subscription & payment management, multi-student accounts. Fully Arabic / RTL.
[Parent app ↗](#) · [Captain app ↗](#)

Faster — Instant Delivery **two-app platform (User + Delegate)**

Same-hour delivery from partner e-commerce stores. User app: ordering, pay-on-delivery, **live rider tracking**. Delegate app: courier request management with real-time location updates.
[User app ↗](#) · [Delegate app ↗](#)

Schoolie — White-Label School Platform

Base school-management product refactored & enhanced (Java → Kotlin) and **productized into multiple white-label school apps**. Shared News Feed, single-entry data propagation across parents/students/teachers, and a rewards system.
[Google Play ↗](#)

Coursemia — Online Learning Platform

Coursera-style platform for healthcare professionals, owned end-to-end to Google Play launch. Multi-module Clean Architecture (MVI) with Koin, Ktor + SSL pinning, and Firebase (Auth, FCM, Crashlytics, Analytics).
[Google Play ↗](#)

Also shipped: Calla Store (e-commerce, Stripe + PayTabs) · seaGo & Book a Boat (marine booking, Maps, Moyasar) · Everything (local-business marketplace) · Al-Shamil (event planning) · Alkarashi (family platform with interactive family tree).

PROFESSIONAL EXPERIENCE

Awamer Aishabaka (AAIT) — Android Developer

Oct 2022 – Present

- Architected and delivered 5+ production Android apps in Kotlin & Jetpack Compose using multi-module Clean Architecture (MVI/MVVM).
- Integrated multiple payment gateways (Stripe, PayTabs, HyperPay, Moyasar) for secure in-app checkout.
- Built real-time GPS tracking and map-based discovery with Google Maps SDK and WorkManager-backed foreground services.
- Established GitHub Actions / GitLab CI/CD pipelines for automated builds, testing, and Play Store delivery — cut release cycle time ~40%.
- Mentored 3 junior developers through code reviews, architectural guidelines, and pair programming.

Coursemia — Android Developer

Jan 2025 – Mar 2026

- Owned end-to-end development from concept to Google Play launch — a Coursera-style platform for healthcare professionals.
- Designed multi-module Clean Architecture (MVI) with Koin DI; built course discovery, enrollment, video playback, and push notifications.
- Integrated Firebase (Auth, FCM, Crashlytics, Analytics) and Ktor-based REST APIs with SSL pinning.

SAGA — Android Developer	Oct 2023 – Aug 2025
- Enhanced a production app and migrated legacy Java modules to modern Kotlin standards. - Applied Clean Architecture to decouple business logic from UI — reduced technical debt and cut onboarding time ~30%. - Resolved critical production bugs through systematic debugging and root-cause analysis.	
Apps Square — Android Developer Intern	Mar 2022 – Aug 2022
Implemented UI features and resolved bugs in an Agile/Scrum environment; hands-on Kotlin and Git workflows.	
MCIT Egypt — Mobile App Developer Trainee	Nov 2020 – Jan 2021
Government-sponsored training in Dart & Flutter; built sample cross-platform apps (UI, state management, navigation).	

EDUCATION & CERTIFICATIONS

B.Sc. Statistics & Computer Science — Faculty of Science, Mansoura University · 2017 – 2021

Certifications: Android Developer Nanodegree (Udacity) · Building an Android App with Jetpack & Kotlin for Java Developers (LinkedIn Learning) · ACM-ACPC Problem Solving · Claude Code in Action (Anthropic)

Languages: Arabic (Native) · English (Professional Working Proficiency)
